**International Conference  
'EDUCATION FOR DEMOCRACY.  
ECONOMIC, HUMANISTIC, AND SOCIOPOLITICAL PROBLEMS'**

Poznań (Poland), March 15-16, 2023

As the key idea of the conference is to work out a possibly objective and comprehensive concept of lifelong education serving democracy, the event itself is meant to be democratic on the level of participants as well as the subject matter discussed. We encourage to participation all those who wish to have their say on democratic education, and we intend to cover the following range of problems – without favoring any particular group of participants or disregarding any of the multiple perspectives on the eponymous issue.

- 1. Challenges of the economic integration of the European Union**
- 2. Economic conditioning of local democracy**
- 3. Counteracting economic and social crises.**
- 4. Economic foundations of the development of education**
- 5. Learning democracy as a psychological process**
- 6. Learning democracy in the family and local environment**
- 7. Learning democracy in school education**
- 8. Cultural differentiation of educational systems**
- 9. Electoral systems as instruments of democracy**
- 10. Government systems as implementation of democracy**

With democracy being a multiple construct requiring an interdisciplinary approach, the conference will also address – on the level of each of the problems above – implications for educational practices at the level of schools, media, non-governmental organizations, and the local government. We believe that by joint consideration of economic, humanistic, and sociopolitical facets in an international circle, the event will serve democratic education by shaping well-informed democratic beliefs, actions, affect, and understanding – thus leading to democratization of modern societies.
