International Conference
‘EDUCATION FOR DEMOCRACY.
ECONOMIC, HUMANISTIC, AND SOCIOPOLITICAL PROBLEMS’
Poznań (Poland), March 15-16, 2023

As the conference is meant to yield reports outlining the condition of democracy in four different sectors – schools, media, non-governmental organisations, and local government, reports will be presented with the consistent sequence followed for the sake of clarify and a constructive approach: the factual state of affairs, comments made with regard to these facts, strategies to apply in order to improve the situation, and forms of (self-)control. In each sector-oriented report:

1. we establish **FACTS** and refer to results of scientific studies, widely accessible statistical data, democratic and non-democratic situations of people; then
2. we distinguish **COMMENTARIES** and draw on particular sources, authors of earlier published texts, expert opinions or our own observations; after which
3. we propose **STRATEGIES** and come up with alternatives, action programs; we avoid here nonconstructive criticism of material and social reality; and finally
4. we design **CONTROL** and consider cooperation of different entities, integral control by task teams, and people advancing plans of actions.
